## WELCOME MESSAGE

2<sup>nd</sup> IEEE International Conference on Cybernetics

Welcome to the 2nd IEEE International Conference on Cybernetics (CYBCONF 2015). The CYBCONF 2015 held in Gdynia, Poland, June 24-26, 2015, was organized by Gdynia Maritime University, IEEE Systems, Man, and Cybernetics Society (SMC), IEEE Poland Section, IEEE SMC Technical Committee on Computational Collective Intelligence, in cooperation with Gdynia Maritime University's Students and Alumni Foundation, and Pomeranian Science and Technology Park, Gdynia, Poland. Scientific patrons of the Conference include Committee on Informatics of the Polish Academy of Sciences and the Polish Society of the Artificial Intelligence.

The CYBCONF conference has been originated to strengthen a tradition of the IEEE SMC Conferences organized periodically with three main components including Systems Engineering, Human-Machine Systems and Cybernetics. The first edition of the IEEE CYBCONF series was held in 2013 in Lausanne.

The main aim of the CYBCONF conference is to provide a premier international forum for researchers and practitioners to report the latest innovations, summarize the state-of-the-art, and exchange ideas and advances in all aspects of Cybernetics. Apart of the main track it includes special sessions and plenary talks by invited eminent speakers.

The CYBCONF 2015 conference attracted a substantial number of researchers and practitioners from all over the world who submitted their papers for several main tracks and special sessions, including Control Systems and Robotics, Artificial Intelligence, Knowledge-Based Systems, Machine Learning, Machine Vision, Computational Intelligence, Swarm Intelligence, Cognitive Systems, Neural Networks, Medical and Health Informatics and Smart Applications. The conference provided also an opportunity to present research results covering specialized subjects, during 7 special sessions organized by renown researchers.

Accepted and presented papers highlight the new trends and challenge of intelligent and complex systems. Each paper was peer reviewed by at least two members of the International Program Committee and International Reviewer Board. Out of a large number of submissions, only 91 best papers have been selected for oral presentation and publication in the CYBCONF 2015 proceedings.

We would like to express our sincere thanks to the Honorary Patron of the Conference Mayor of Gdynia, Dr. Wojciech Szczurek. Our special gratitude goes to the IEEE SMC Vice President Cybernetics, Prof. Vladimir Marik, Czech Technical University, Czech Republic, and to the President of IEEE Poland Section, Prof. Ryszard Jachowicz, Warsaw University of Technology, Poland, for their support. We also would like to express our thanks to the Keynote Speakers - Prof. Jun Wang, The Chinese University of Hong Kong, China, Prof. Fabio Roli, University of Cagliari, Italy, Prof. Edward Szczerbicki, The University of Newcastle, Newcastle, Australia,

and Prof. David Camacho, Universidad Autonoma de Madrid, Spain. We also thank co-organizer Pomeranian Science and Technology Park in Gdynia, Poland, for helping to host the event, and Gdynia Maritime University's Students and Alumni Foundation for helping to organize the event.

Our special thanks go to the Local Organizing Committee with the Local Arrangements Co-Chairs. Thanks are due to the Program Co-Chairs, Special Sessions Co-Chairs, Publication Co-Chair, Publicity Co-Chairs, all Program and Reviewer Committee members and all the additional reviewers for their valuable efforts in the review process which helped us to guarantee the highest quality of the selected papers for the conference. We cordially thank the organizers and chairs of special sessions which essentially contribute to the success of the conference.

Finally, we cordially thank all the authors, presenters and delegates for their valuable contribution to this successful event. The conference would not have been possible without their support.

European Solidarity Centre (ECS) is located on Solidarity Square with the historical Gate of Gdansk Shipyard, where the Solidarity movement was born. Its main mission is to commemorate, maintain and popularise the heritage and message of the Solidarity movement and the anti-communist democratic opposition in Poland and throughout the world. The center popularizes and inspires to new cultural, civic, trade union, local government, national and European initiatives with a universal dimension.

In Gdansk - Hanseatic thousand-year-old town - we will show you the most famous Gdansk monuments located near the heart of its Old Town district, around the Long Street and the quayside. You will walk the Long Street and the Market Square and admire the Main Town Hall, the famous Neptune Fountain, the Golden House, the Court of Artus and the beautiful XVI – XVII century houses. At the end of the Market Square you will find the Green Gate. Next, you will see the picturesque old quayside by the Motlava River. Then you will have a chance to see another great monument – the Crane. Later, we will take you to the charming Mariacka Street with the largest red-brick gothic church in Europe – St. Mary's Church. The Mariacka Street hosts also the famous Gdansk amber manufacturers with their gorgeous handicraft.

On our way back to Gdynia, we will stop in Sopot to see the longest wooden pier in Europe.

### Moving around the city of Gdynia and the Tricity area

#### Bus/trolley-bus

Gdynia has a very well developed bus network. Each part of the city can be easily reached by bus or trolley-bus. One ticket costs from 3,00 PLN to 4 PLN (about 0.70 -1 EUR) and can be bought directly from the bus driver and then should be punched. You may have to buy a set of four tickets and you can pay only in PLN.

#### Commuter Train (SKM)

A commuter train, known as SKM (Fast City Train), runs constantly between Gdynia, Sopot and Gdansk from 5 am till midnight, stopping at a dozen intermediate stations. The trains run every 5 to 10 minutes (not so frequently in the evening) and the trip to Gdansk takes about 35-40 minutes. You buy tickets at ticket offices in the stations or some newsstands and validate them in the yellow machines at the platform entrance. The fare depends on the distance. When buying a ticket, say the name of station you want to go to.

## ABOUT TRICITY

2<sup>nd</sup> IEEE International Conference on Cybernetics

The cities of Gdynia, Sopot and Gdansk are called "Tricity Complex" and are seldom visited apart from each other. Although each bears its own distinct identity they have become identified together. Those enjoying long walks may try to reach Gdansk (starting from Gdynia through Sopot) along the beach.

### GDYNIA

Having received its city rights in 1926, Gdynia is one of the youngest Polish cities and has about 251,000 inhabitants. With its very big and famous harbour, Gdynia is the sea capital of Poland. No other Polish town and only few European cities have such a long seafront and easy access to the sea. It is 12.5 km long, excluding the port area. Gdynia offers a great variety of tourist attractions. Its Music Theatre attracts culture friends from all over Poland. The Municipal Theatre is perhaps a little more "sepias", although also involved in music since it houses jazz events. Every summer at Gdynia, theatre lovers may watch the shows without leaving the beach since there are theatre performances on the so-called "Summer Stage". Fascinating items from the time when Gdynia was a little village are displayed in the "Museum of Gdynia". Visiting this museum, it is hard to believe that this forgotten village became "the Polish New York" (National Geographic) after only 13 years of development. Luxury shops, located next to large markets such as the famous Market Place (Hala Targowa), offer an excellent selection of goods. Open-air-events, such as New Years Eve, street basketball, may picnic, sea days, regatta and motor-cross tournaments attract thousands of inhabitants and visitors from other places. Politicians, social and business activists often choose Gdynia as place of their meetings.

### SOPOT

Neighbouring Sopot is a seaside health resort with unusual microclimate. Beautiful wide beaches, a breezy boardwalk, elegant hotels with full amenities and a rich cultural program attract visitors from Poland and Europe.

### GDAŃSK

Gdansk had a tumultuous history, with citizens from Germany, Poland and other countries contributing to its cosmopolitan air. After being overrun by the Teutonic Knights, Gdansk joined the Hanseatic League in the 14th century. In the 17th century, it was one of the few Polish cities to withstand the Swedish invasion. After World War I, it was declared the Free City of Gdansk/Danzig. On September 1, 1939, the first shots of World War II were fired at Westerplatte, a Polish garrison outside the city. The city was nearly levelled during the war and meticulously rebuilt for the next twenty years. In 1970, a massive demonstration against the Communist regime originated in the Gdansk Shipyard. Ten years later, another shipyard protest led to the creation of the Solidarity Labour Union. In 1990, former shipyard worker and Solidarity leader Lech Wałęsa was elected President of newly Democratic Poland.

In the Old Town, visitors can once again be impressed by the authentically restored city hall, the Neptune Fountain, the Arthur's Court, the Golden Gate, Green Gate and the gothic church of the Holy Virgin Mary. Along the waterfront the Old Crane, today a maritime museum, dominates the skyline. Westerplatte obelisk just outside the city, where the World War II began, and the Monument of Murdered Shipyard Workers, dedicated to the workers who died during anti-Communist demonstrations, are mementoes of the city's modern history. Also near Gdansk is the suburb of Oliwa, the site of an immense cathedral whose impeccable acoustics capture the magnificent sounds of the great organ during public recitals.

The city's most famous citizens include astronomer Johannes Hevelius, physicist Gabriel Fahrenheit, philosopher Arthur Schopenhauer, writer Gunter Grass and, most recently, Lech Wałęsa.
